

Glens Falls, NY –Danfoss Flomatic Corporation introduces an extended Automatic Control Valve Model C line up thru 36” with unique features and excellent flow characteristics. These fusion epoxy coated internal and external bodies come standard with copper tubing and have a valve trim of unleaded bronze on their sizes 1”-10” or stainless steel on 12” and 36”. They also come standard with, control tubing, valves, gauge cocks, body drain plugs and EZ off Jack screw for covers and valve seat rings.

Danfoss Flomatic can also equip these control valves with many popular options such as a dual power chamber, a built in check feature, electric controls and stainless steel wire braided tubing.

Danfoss Flomatic’s decades of experience, along with three-dimensional Computer Assisted Design (CAD) have produced some of the most advance control valve on the market today.
