Flomatic Valves

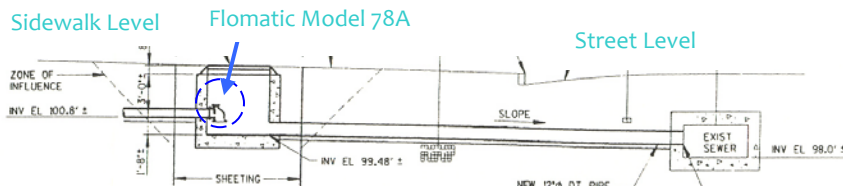

Model 78A Flapper Swing Check Valves

New York CITY
Keeping the Subway Running Dry

**Flomatic
Swing & Flapper
Check Valves**

Photo above shows a typical installation of two 10" (250mm) Model 78A angled flapper swing check valves installed in New York City. Valves are piped to the discharge of submersible pumps used for the NYC subway systems. NYC has the largest subway system in the world, with over 650 miles of track below ground.
