NEWS RELEASE

FOR IMMEDIATE RELEASE

Glens Falls, NY- Danfoss Flomatic Corporation introduces a new submersible pump check valve Model 100XLSS with extra long threaded connections for use with special PVC drop pipe and other applications where extra length is needed. This new product features a stainless steel cast body with a patented Flow Fin™ poppet to prevent blocked flow. The new Model 100XLSS check valve model also has extended threaded lead-in to support PVC drop pipe, in addition to **featuring easy start** longer male and female threads. Their exclusive check valves are “Made in America” to precise dimensions and come with a 5-year warranty. The Model 100XLSS check valves feature durable internals for applications and are suitable for use in water, fuel oil and diesel fuel. Danfoss Flomatic manufactures other check valve models for the water well industry that come in a variety of configurations, with size ranges from ¼” through 10”. The new valve is another addition to the most complete check valve package in the industry.

For more information, please call Danfoss Flomatic Corporation at 1-800-833-2040. You will also find detailed information on these products and all of their products at www.flomatic.com or please feel free to email them at flomatic@flomatic.com.
