---

Glens Falls, NY – Flomatic Corporation introduces a new, high-strength engineered composite break-off plug for 3"-8" submersible ductile iron valves. The 3/8" break-off plug is made from NSF<sup>®</sup> approved material and allows users to easily field cut at marked grooves to make a plug for various size valves. A plug allow for lighter lifting weight by allowing water to drain from pipe after the plug is broken by dropping a smaller pipe down the inside diameter of the pipe. It also eliminates water accumulating at the surface of well making for a clean and simple pull of riser pipe.

For more detailed information on Flomatic's new composite break-off plug or to obtain a copy of the new 2012 condensed valve catalog, visit [www.flomatic.com](http://www.flomatic.com), email them at [flomatic@flomatic.com](mailto:flomatic@flomatic.com), call Flomatic Corporation at 1-800-833-2040 or fax them at 1-800-314-3155.
