Check Valves

SERIES
60SE, 80E, 100E

New!
Also available in Stainless Steel!

High Quality Valves Built to Last...
Industry proven design and millions in operation, the patented WCR™ (Warranted Check Reliability) poppet has evolved from Flomatic's pioneering work in stemless poppet design to eliminates problems associated with stem guided valves. We believe our valves to be the best on the market today from any standpoint — poppet strength, head loss, long life, noiseless, and trouble-free operation.

The patented WCR™ poppet is designed to float evenly in the water flow when the valve is open. It will not flutter, spin, or wobble. This eliminates a major cause of poppet wear and valve hang-up. Flomatic makes the only foot and check valves that have a five year warranty.

Flomatic's check valves are made from the finest materials available to provide long life and superior performance. Poppets are of Delrin® with Buna N rubber sealing discs and stainless steel springs.

The first UNLEADED CHECK VALVE was developed by Flomatic Corporation in 1991 in order to protect potable water from lead contamination.

The ENVIRO-CHECK® valves in this series are designed to comply with California Proposition 65, the most stringent of the state and proposed EPA guidelines for reduced lead content and lead leaching.

These check valves are suitable for use in water, oil and gasoline, and are warranted for five years.

60SE-ENVIRO-CHECK - body with threaded female connection. Features a NITRILE (Buna-N) seal, acetal poppet, stainless steel spring and strainer.

Temp Max: 180° F (80C) Pressure Max: 250 PSI Note: For BSP and BSPP threads CONSULT FACTORY.

Up-Grade Option:

Stainless steel internal poppet system available on all models.

These new check valves have durable internals for more aggressive applications. They feature an all 316 stainless steel guide.

The stainless internal poppet system is also available as an option in all our Enviro Check® valve models.
