January 2nd, 2019 Glens Falls, NY – Flomatic is pleased to announce the release of additional sizes and flow ranges to its constant flow control valve Flo-Trol[®] Model CD900 family, all in a stainless steel body.

The Flomatic[®] Flo-Trol[®] automatic flow control valves are designed to give constant flow over a wide pressure range. The valve design has no moving part; rather, a self-cleaning flexible orifice that varies in size with applied pressure so that a constant flow rate is maintained. Flow rates are maintained to within $\pm 15\%$ between 15 and 125 PSI. Each Flo-Trol[®] valve is laser engraved with flow rate, size, and certification. In addition, each Flo-Trol[®] valve comes sealed, color-coded, and labeled.

Flomatic[®] Flow Control Valves are used in a multitude of applications such as Low Yield Water Wells, Tankless water heaters, Water Softeners, Irrigation Systems, and UV Filters, to name a few.

The Flo-Trol[®] Model CD900 is available in seven different sizes ($3/8$ " thru $1\ 1/2$ ") and very wide flow ranges (0.25 GPM to 30 GPM). Additional specifications include a Pressure Max of 200 PSI and Max Temperature of 180°F (82°C).

The Flo-Trol[®] CD900 are NSF/ANSI 61 & 372 certified and covered with a three-year warranty.

For more than 85 years, Flomatic has been changing the industry valve and leading the market. Manufacturing a full line of check valves for the water and wastewater market, ranging from 1" – 36". Flomatic's products have been installed in a wide variety of applications with excellent results. Flomatic[®] is an ISO 9001 and 14001 certified company with comprehensive manufacturing processes and AIS compliant products.

For more detailed information on Flomatic's new Flo-Trol[®] Model CD900 flow control or to obtain a copy of the new 2020 condensed valve catalog, contact Daniel Hidalgo at 518-761-9797 ext.203 or visit our website at: <https://www.flomatic.com/>
