March 12<sup>th</sup>, 2019 Glens Falls, NY – Flomatic® is pleased to announce the release of their new constant flow control valve Flo-Trol® Model CD900 with a stainless steel body.

The Flomatic® Flo-Trol® automatic flow control valves are designed to give constant flow over a wide pressure range. The valve design has no moving part; rather a self-cleaning flexible orifice that varies in size with applied pressure so that a constant flow rate is maintained. Flow rates are maintained to within ±15% between 15 and 125 psi.

The Flo-Trol® Model CD900 is available in five different sizes ( $\frac{3}{8}$ " thru 1") and 58 different flow ranges (0.25 GPM to 30 GPM). Additional specifications include a Pressure Max of 200 PSI and Max Temperature of 180°F (82°C)

The Flo-Trol® CD900 is NSF/ANSI 61 & 372 certified and covered with a 3 year warranty.
