Glens Falls, NY – Flomatic Corporation introduces a new ½” break-off plug for 8” submersible ductile iron and stainless steel valves, these are made in 303 stainless or a high- strength engineered composite material. A break-off plug allow for lighter lifting weight by allowing water to drain from pipe after the plug is broken by dropping a smaller pipe down the inside diameter of the pipe. It also eliminates water accumulating at the surface of well making for a clean and simple pull of riser pipe. This new ½” size allows for quicker drainage from the pipe verses the standard 3/8” size.

For more detailed information on Flomatic’s new larger ½” break-off plugs or to obtain a copy of the new 2014 condensed valve catalog, visit www.flomatic.com, email them at flomatic@flomatic.com, call Flomatic Corporation at 1-800-833-2040 or fax them at 1-800-314-3155.
