---

Glens Falls, NY – Flomatic Corporation introduces new tapped valves, featuring a patented VFD design made from an unleaded bronze body with tappings of 1/8" and 1/4" for all types of water well accessories. The "A", "B", and "C" taps allow for easy connection of the pressure switch, pressure gauges and many other types of accessories. These valves have very low head loss and noiseless operation. They have extra-large bosses that give more threads to ensure the fitting is secure. The design eliminates the issue of threading the fittings too far into the body and interfering with the poppet. The new tapped valve poppet design does not allow any interference with the poppet operation. All internal parts are made from corrosion-resistant materials and have a durable high strength design. The valve can be installed in either horizontal or vertical piping installations.

For more detailed information on Flomatic's new **Model VFD unlead tap check valve** installation or to obtain a copy of the new 2017 condensed valve catalog, visit [www.flomatic.com](http://www.flomatic.com), email them at [flomatic@flomatic.com](mailto:flomatic@flomatic.com), call Flomatic Corporation at 1-800-833-2040 or fax them at 1-800-314-3155.
