---

Glens Falls, NY –Danfoss Flomatic Corporation introduces their new Enviro check valves with an upgraded poppet system option. The valve option is a 316 stainless steel internal poppet system and is available in a size range of 1” thru 4” and replaces the standard bronze or plastic WCR™ poppet. The unleaded bronze body high temperature check valves are designed to be maintenance free and suitable for installation in any position. All of the components have a sturdy corrosion free construction, capable of withstanding repeated normal operation without failure or excessive wear. These valves are ideal for hot water applications and are designed to operate at a maximum water temperature of 400°F.

For more information, please call Danfoss Flomatic Corporation at 1-800-833-2040.
