Glens Falls, NY- Danfoss Flomatic Corporation introduces a new four-color bulletin covering their AZURE™ AWWA Butterfly Valves. These new ductile iron flanged butterfly valves compliment Danfoss Flomatic's popular Sylax® series lug and wafer style butterfly valves and general purpose Kwik-Close™ butterfly valves. The Model AZURE™ is designed to ANSI/AWWA C504 Butterfly valve standard and is available in a size range from 3" thru 30" and with high flow capacities. The concentric high strength ductile iron disc with, *stainless steel edge seating*, provides minimal pressure drop and low turbulence. On the 24" and smaller design, Danfoss Flomatic's AZURE™ utilizes a lens shaped disc which provides the smallest protrusion possible in the flow stream. The valve seat is simultaneously bonded and vulcanized to the valve body. The entire interior waterway of the valve body is rubber-lined to prevent corrosion and will extend service life. On 30" and larger valves, the seat is adjustable and replaceable in the field without the use of special tools. This new bulletin explains the AZURE™ AWWA Butterfly Valve's features and benefits, dimensions and also has suggested specifications.

For more information, please call Danfoss Flomatic Corporation at 1-800-833-2040. You will also find detailed information on these products and all of their products at www.flomatic.com or please feel free to email them at flomatic@flomatic.com
