Flomatic Introduces New 1 1/2" All-Stainless Steel Model 888S6VFD Wafer Style Check Valve

September 16th, 2024 Glens Falls, NY – Flomatic, a leading manufacturer of innovative valves, is excited to announce the expansion of its popular Model 888S6VFD wafer check valve line with the introduction of a new 1 1/2" in an all-stainless steel construction.

This new size joins Flomatic's existing range of 2" through 6", offering customers even more options to meet their specific application needs. The all-stainless steel construction provides exceptional corrosion resistance and durability, making it ideal for demanding environments.

The Model 888VFD is a patented check valve designed for next-generation VFD-controlled pump systems. Its unique poppet design ensures quiet and efficient operation across a wide range of flow velocities, helping to reduce water hammer shock. This valve is perfect for booster pump systems, VFD-controlled pumps, municipal water, industrial, and other clean water system applications.

Key features of the Model 888S6VFD include:

- **Patented convex disc design:** Provides consistent and reliable laminar flow.
- **Sturdy EPDM O-ring seal:** Ensures drip-tight closure.
- **Lower head loss:** Reduces energy consumption.
- **Easy serviceability:** Simplifies maintenance and repairs.
- **Temperature rating:** 200°F (93°C)
- **Pressure rating:** ASME 150#: 275 PSI at 100°F / ASME 300#: 475 PSI at 100°F
- **Material:** All 316 stainless steel
- **Compatibility:** VFD-controlled systems
- **Flange class:** Dual rated for class 150 and 300 flanges

The 1 1/2" all-stainless steel Model 888S6VFD check valve is NSF/ANSI 61, ensuring safe and reliable performance in drinking water applications.

Additionally, Flomatic is pleased to announce the availability of the new 1 1/2" Sylax®3 Butterfly Valve. When combined with the Model 888S6VFD check valve, these valves offer a comprehensive solution for a wide range of flow control applications.

For more information about the new 1 1/2" Model 888S6VFD check valve, the 1 1/2" Sylax®3 Butterfly Valve, and Flomatic's complete product line, please visit www.flomatic.com or contact our sales team at 518-761-9797
